(Step) AFTER - steps.AfterActions.  
tearDown(io.cucumber.java.Scenario)

(S) Searching for new car with excel data

(F) Searching for new cars

The screenshot shows the carsguide website interface. At the top, there's a search bar with the text "Search for make, model, body type" and a "Sell my car" button. Below the search bar, there's a navigation menu with links like "buy + sell", "reviews", "news", "advice", "pricing", "specs", and "guides".

The main content area is titled "SEARCH FOR CARS" and includes a "CLEAR ALL" link. It features a "Contactless Car Buying" section with a checkbox for "Contactless Experience". Below this, there's a "Basic" section with a checkbox for "All New & Used Cars" and a "New Cars" section with checkboxes for "Available to order", "In Stock / At the dealer", and "Dealer Demonstrator".

The search results section shows a message: "Uh oh! There doesn't seem to be any cars that exactly match your criteria. Please try broadening your search by removing filters." It lists the applied filters: "Seller Type" (Available to order, In Stock / At the dealer, Dealer Demonstrator), "Make" (BMW), "Model" (1 SERIES), "Location" (ACT - All), and "Price" (Up to \$10,000). A "TRY FEWER" button is visible next to the filters.

The results section displays a car listing for a "2008 BMW 120D" with a price of "\$7,999". The listing includes details like "178,106 km", "Automatic", "USED Dealer ad", and "North Saint Marys, NSW".

On the right side, there are two promotional banners for "SELLING YOUR CAR WITH AUTOTRADER" and a "Sell your car for free today" section with a "Sell my car" button.
